MINH VO

Business Intelligence & Insights Analyst | SQL · Power BI · Tableau · Python
Houston, TX 77042 (willing to relocate) | 206-446-6659 | minhdvo0317@gmail.com | LinkedIn | My Portfolio

EDUCATION

The University of Chicago (Chicago, IL) **09/2022 – 12/2023**
Master of Science in Applied Data Science **GPA: 3.8/4.0**
Final Personal Project: Navigating AI Revolution - NLP analysis of 200K news articles to identify AI's impact across industries.
University of South Florida (Tampa, FL) **08/2019 – 05/2022**
Bachelor of Science in Business Analytics and Information Systems, Minor in Management **GPA: 3.8/4.0**

SKILLS

Data platforms: Google BigQuery, SQL Server
Analytics & Visualization: Advanced Excel, SQL, Python, R, Tableau, Power BI
AI & Productivity: Generative AI Prompt Engineering (Claude, ChatGPT)
Domain: Financial Analysis, Property Tax, Sales Analytics, Insurance Analytics

EXPERIENCES

O'Connor and Associates – *Business Analyst* **02/2024 – present**
- Analyze income and valuation data across a $700M commercial property portfolio using Excel, identifying tax reduction opportunities that contribute to an average 10% reduction in property tax liability for clients.
- Build automation pipeline on Claude to automate evidence-file preparation and appeal support documentation, reducing manual processing time and improving hearing readiness while maintaining client confidentiality.
- Design a Power BI dashboard to help the hearing-agent team track account assignments, hearing schedules, appeal status, and tax reduction outcomes, replacing manual tracking and improving team workflow efficiency.

New York Life Insurance Company - *Data Science Analyst Intern* **06/2023 – 08/2023**
- Spearheaded the analysis by conducting data preprocessing, feature engineering, and feature selection of over 2,000 new financial and demographic data attributes using SQL and R, identifying key features that impact AARP non-member insurance application success.
- Collaborated with Marketing stakeholders to translate analytical findings into actionable insights and campaign recommendations, supporting their targeted campaign strategy.
- Created comprehensive technical documentation for data pipelines, ETL processes, and analytical methodologies, enabling efficient team onboarding and ensured knowledge transfer.

GoDaddy - *Data Analyst Intern* **05/2022 – 08/2022**
- Analyzed 225,000+ geographic domains in the NameFind portfolio, using SQL and Excel to pull data from multiple sources, and built an interactive KPI dashboard to uncover the sales performance of geo domain.
- Presented geographic domain findings to multi-level sales stakeholders, aiming at helping them improve the current pricing models.
- Conceptualized hypotheses and tested ideas to initiate an A/B experiment that decreases price up to 60% of 79,000 lower demand geo domains, aiming at increasing sales velocity and revenue.

Artera (A SaaS healthtech startup) - *Sales Operations Intern* **01/2022 – 04/2022**
- Improved data quality and consistency by leveraging LinkedIn and ZoomInfo for lead research and cleaning datasets including over 2,000 contacts, enhancing lead-to-opportunity conversion rate of the sales teams.
- Reviewed Salesforce Configure Price Quote (CPQ), saving 10 hours of manual work weekly.
- Developed interactive dashboards and reports on Salesforce data, enabling real-time insights into sales and marketing teams.

Hartford Funds - *Business Intelligence Intern* **05/2021 – 08/2021**
- Built and maintained a monthly Tableau BI dashboard showcasing Hartford Funds' sales performance insights, delivering impactful data visualizations that drove data-driven decision-making in the sales department.
- Processed data from SQL Server and Salesforce to create ad-hoc reports using SSRS that supported external sales team's operations.

PROJECTS

Divvy Bike-Sharing System Analysis (*MySQL, BigQuery, Python, Tableau*) - Link
- Designed a relational schema and built an ETL pipeline into BigQuery to enable analysis of Divvy ridership.
- Performed data analysis and developed Tableau dashboard evaluating current ridership among locations and rider groups and measuring the impacts of external factors (e.g., snow, precipitation) on the bike-sharing ridership.

Time Series Analysis for Chicago's Trade Forecast (*R*) - Link
- Implemented seasonal ARIMA, ETS, regression with ARIMA errors to forecast monthly import trend in Chicago before and after COVID in the period of 01/2002 – 12/2023, resulting in two best models for two different periods.

LEADERSHIP

SheCodes Vietnam (A non-profit organization for Vietnamese women in tech)
Content Creator & Market Research Analyst **12/2020 – 04/2022**
- Collborated with cross-functional volunteer teams to conduct market research and engagement strategy, growing social media engagement by 20%.
- Organized and hosted virtual events including webinar on women in data (100+ attendees) and 2-day hackathon (200+ participants).
